

## Adam Gallub's Engineering Notebook

- Working on User Manual - (1.5 hours) (Worked mainly on the Installation Section and General Formatting on what the User Manual will look like)
- Worked on installing Kaldi and updating the user manual. Error occurred with installation, (0.5 hours) however another curious problem occurred when trying to delete kaldi. It was giving me an error and so note in the user manual is using the command `rm -rf "nameoffile"`.
- Worked on installing Kaldi, and came across a couple of issues. The main issue was (1.75 hours) installing Mkl which has not been solved but the problem reason has been solved. *-Researched other teams on doing kaldi*
- Worked on installation, and running the demo as well as updating the user manual and solving the previous issue from before - (2 hours)
- Worked on putting in the images for the user manual, and helping mac installation, (1hour)
- Worked on section 3.1 and some of 3.2 of the user manual with milan in getting it perfect, and written well. (2.5 hours)
- Worked with Nemo group to look at building Kaldi its own script, and Worked on the user manual with 3.2.1, 3.2.2 and finished 3.1 (1.5 hours)

*The reason the issue is happening is because of intel which makes the program have a NO PUB\_KEY error. Still looking for solutions. The gen number may matter, however what is for certain is that it has to be somewhat newer. 10 years is the limit so far. - may be used for common problems in User Manual For next time work on Installing MKL and going to part 3 and 4 of installation*

*-Worked with the Nemo group to look at building a script.*

*-Started scripting*

*(1.5 hour)*

Worked on section 3.2.2 , almost finished waiting for editing. Started 3.2.3

(1.5 hours)

*-Worked on slides, user manual, specifically spent most of the time on the common problems section*

*-Finished all sections in the USER MANUAL that I have worked on 1 hour*

*-Worked on creating hours for tasks for Sprint 2, also worked on Section 8 of the user manual which is the contacting support section (2 hours)*

*-Worked on Section 9 of the user manual, and helped with mac installation (1.5 hours)*

*-Worked on A little bit of finishing of the glossary, and the most of the time worked on the Kaldi Script (2 hours)*
